[in](#) [Linkedin](#) [G](#) [GitHub](#)

Engineering Trainee aspirant with strong foundations in object-oriented programming and backend system design, experienced in building scalable web applications and RESTful APIs. Skilled in contributing across the software development lifecycle, from design to deployment. Passionate about developing high-volume, low-latency systems with clean, production-ready code aligned with modern fintech ecosystems.

Education

Vellore Institute of Technology

Bhopal, Madhya Pradesh

B.Tech. Computer Science and Engineering GPA: 8.73/10

Sep 2022 – Jun 2026

Internship

CoreCard Software India Pvt. Ltd.

Bhopal, Madhya Pradesh

Worked in the Data Warehouse department

Jan 2024 – Jan 2024

- Wrote optimized SQL queries and performed data validation to ensure accuracy and performance efficiency on large-scale relational datasets.
- Assisted in maintaining structured data pipelines within enterprise systems.
- Developed Power BI dashboards for analytics visualization.

Projects

MediSinCare: A Healthcare Platform | [GitHub](#)

- Designed and implemented modular frontend architecture for a healthcare recommendation platform and implemented reusable components for scalability.
- Integrated REST APIs for dynamic symptom-based data processing
- Optimized UI rendering and navigation performance through structured component design
- Collaborated in a team-based agile workflow with version control practices

ImageGuard: AI-Powered Image Tampering Detection | [GitHub](#)

- Developed a scalable React frontend integrated with Flask backend APIs
- Optimized client-server communication for low-latency inference results
- Contributed to containerized deployment using Docker and AWS EC2
- Designed RESTful endpoints for inference requests ensuring scalable and stateless backend processing.

Movie Ticket Booking Platform | [GitHub](#)

- Designed and implemented RESTful APIs using Java-based backend following MVC architecture for high-volume booking workflows.
- Designed ACID-compliant normalized database schema to prevent booking race conditions and ensure transactional integrity.
- Implemented unit testing and conducted systematic debugging to resolve booking concurrency conflicts and ensure data integrity and used Git for version control and collaborative development.

Technical Skills

Languages: Java, Python, JavaScript

Core Concepts: Data Structures & Algorithms, OOP, REST APIs, Design Patterns (MVC, Singleton)

Web & Frameworks: React.js, Node.js, HTML5, CSS3, Spring Boot, Microservices Architecture (Basics)

Databases: MySQL (RDBMS), MongoDB (NoSQL)

Tools & Technologies: Docker, AWS EC2, Jenkins, Git/GitHub

Certifications & Training

- **IBM:** Gen AI
- **SmartBridge:** Fullstack Development MongoDB

Achievements

Research paper

- Selected among 1,200 research scholars out of 168,000 applicants for presenting a paper on Art, Literature, and Culture of India at the Bhartiya Shiksha Mandal-Vision for Viksit Bharat 2024 National Conference.

Leetcode

- 100+ problems solved, strengthening proficiency in data structures, algorithmic thinking and optimized problem-solving.
