

Computer Science undergraduate with strong foundations in object-oriented programming and backend system design, experienced in building scalable web applications and RESTful APIs. Skilled in contributing across the software development lifecycle, from design to deployment. Passionate about developing high-volume, low-latency systems with clean, production-ready code.

Education

Vellore Institute of Technology

Bhopal, Madhya Pradesh

B.Tech. Computer Science and Engineering GPA: 8.77/10

Sep 2022 – Jun 2026

Technical Skills

Languages: Python, Java, JavaScript

Databases: MySQL (RDBMS), MongoDB(NoSQL)

Core Concepts: Object Oriented Programming, Data Structures & Algorithms, Software Development Lifecycle, REST APIs, Problem Solving, Database Management Systems

Web & Frameworks: React.js, Node.js, HTML, CSS, Spring Boot

Tools & Technologies: Docker, AWS EC2, Jenkins, Git/GitHub, Power BI, Microsoft Excel

Internship

CoreCard Software India Pvt. Ltd.

Bhopal, Madhya Pradesh

Software Developer Intern

Jan 2024 – Jan 2024

- Wrote optimized SQL queries and performed data validation to ensure accuracy and performance efficiency on large-scale relational datasets.
- Assisted in maintaining structured data pipelines within enterprise systems.
- Built Power BI dashboards for data analytics and reporting.

Projects

MediSinCare: A Healthcare Platform | [GitHub](#)

- Developed reusable React components for a healthcare recommendation platform.
- Integrated REST APIs for symptom-based health recommendations.
- Improved UI performance through optimized component structure.
- Collaborated in a team-based agile workflow using Git version control.

ImageGuard: AI-Powered Image Tampering Detection | [GitHub](#)

- Developed Flask-based Python REST APIs for image tampering detection inference.
- Implemented backend services for image processing and model inference requests.
- Integrated React frontend with Python backend APIs for real-time detection results.

Movie Ticket Booking Platform | [GitHub](#)

- Built RESTful APIs using python for ticket booking workflows.
- Designed normalized relational database schema to ensure transactional consistency.
- Implemented unit testing and debugging to resolve booking concurrency issues.
- Used Git for version control and collaborative development.

Certifications & Training

- **IBM:** Gen AI
- **SmartBridge:** Fullstack Development MongoDB

Achievements

Research Publication

- Selected among 1,200 research scholars out of 168,000 applicants for presenting a paper on Art, Literature, and Culture of India at the Bhartiya Shiksha Mandal-Vision for Viksit Bharat 2024 National Conference.

Leetcode

- 100+ problems solved, strengthening proficiency in data structures, algorithmic thinking and optimized problem-solving.
